General Comment

This is genuinely, in my honest opinion, a very bad thing for the American Government to focus on.

I do not believe AI holds a place in the future of the US.

I ask this genuinely: Who needs it?

AI steals from my livelihood as an American and profits off of theft.

AI is over-hyped and is fleecing the eyes of the American public.

Everything nowadays has some form of AI built into it, when we, the people, do not need it.

Not to mention, AI is a speculative market similar to cryptocurrency and NFTs (Non-Fungible Tokens), with false promises to fool the public and huge legal problems by enabling them.

Nvidia's \$600B market cap drop was not an accident, AI is a speculative bubble waiting to pop.
