General Comment

The American people do not want this. We, human creators of academic and creative prose, do not want this. I, a published author, do not want a poorly designed algorithm to be given access to and trained on words that I worked hard to put together to create logical, convincing arguments so that it can produce likely-sounding garbage that is devoid of sense simply because the U.S. government has invested so much money into this project already that it cannot admit that the "AI" project as it currently exists is a waste and a failure. Copyright and the way that it limits the "OpenAI" project should be MAINTAINED.
