General Comment

"Artificial Intelligence" is a program of mass-theft and mass-degradation of American lives. It does not have a future in American life and is most likely going to implode within the next few years. Relying on and investing in "AI" will not only not benefit Americans; it will also hold us back as a population. Students in particular will lose their ability to perform competitively with young people of other nations, because AI reduces critical thinking and creativity in students. The only action we should be considering in regards to AI would be to shut down opportunities for investment and ban AI companies from stealing the intellectual property of writers, musicians, visual artists, and other creatives and intellectuals.
