Recently Posted NSF Rules and Notices.

Comment On: NSF_FRDOC_0001-3479

Request for Information: Development of an Artificial Intelligence Action Plan

Document: NSF_FRDOC_0001-DRAFT-3584

Comment on FR Doc # 2025-02305

Submitter Information

Name: Elizabeth
Metz

General Comment

Generative AI is not possible without widespread theft of copyrighted material, both writing and art. As an artist and a writer myself, I am horrified that my government would choose to privilege a corporation over its own citizens' lawful copyrights.

Furthermore, it produces bad content. AI art is ugly, lacking any human warmth, wisdom, interest, or intellectual perspective. AI writing and research is incorrect all the time. Like, constantly. I've seen it, as tech companies keep trying to force AI tools on end users. We don't want it.

Finally, widespread adoption of AI will eliminate work for humans and upend the economy. This is good for no one except the tiny handful of business owners who stand to profit by mass layoffs.

AI is not worth investing in. I oppose this measure with my entire being.
