Comment On: NSF_FRDOC_0001-3479

Request for Information: Development of an Artificial Intelligence Action Plan

Document: NSF_FRDOC_0001-DRAFT-3594

Comment on FR Doc # 2025-02305

Submitter Information

Name: E VanEvery

General Comment

Generative AI is a useless, expensive, wasteful product that brings nothing to the nation or world, and will actually **impede** human flourishing if it is allowed to continue existing.

The best approach to generative AI would be for it stop existing entirely. If it does continue to exist, it ABSOLUTELY **must not** be built using the stolen work of actual humans. That is non-negotiable.

Large Learning Models have uses in data analysis that are important for science, health, and national defense. Even so, these models must be tailored to extremely narrow specifications and parameters, and must not use stolen data as part of their function.

Generative AI is worthless and should be destroyed for the well-being of all humans.
