General Comment

No. As a professional artist this would negatively severely impact my entire field, and those adjacent, by giving unapproved (by the lawful copyright holder of their art) individuals, parties, and business, permission to use their art without the artist's permission or consent. There are much more ethical ways to go about the development of tech. If one must strip all consent and ethics in the name of so-called "development" and "innovation" then that is not right by any definition. Copyright theft should not be made legal for certain entities.
