General Comment

Artificial Intelligence and its creators should not be allowed to steal from and profit off of the works of artists, writers, film makers, animators, or anyone else. The use of AI to do so goes against all intellectual property laws, and if this request is approved, it sends the message that there is no longer any respect for ownership of work and IP. This would effectively normalize theft on a grand scale, as if it is acceptable for AI companies to steal and violate IP law at this scale, there can be no justification that any individual or company cannot steal from another.
