General Comment

AI should not use data without permission from the creators of that data. This is stealing from creators. AI can still operate using public domain creations. Computers should not have special freedom to steal when humans are bound by law. America is a world leader in creativity, we do not need to resort to regurgitation. We should not be churning out poorly done, cheap bootleg copies that shame our country's famed artists and creatives. Let us lead instead of follow. Thank you.
