Received: March 15, 2025
Status: [REDACTED]
Tracking No. m8a-vq5y-1dxy
Comments Due: March 15, 2025
Submission Type: API

Docket: NSF_FRDOC_0001

Recently Posted NSF Rules and Notices.

Comment On: NSF_FRDOC_0001-3479

Request for Information: Development of an Artificial Intelligence Action Plan

Document: NSF_FRDOC_0001-DRAFT-3648

Comment on FR Doc # 2025-02305

Submitter Information

Name: Michael Gissell

[REDACTED]

General Comment

I'll put this into points:

- 1) I would like to be able to not be in revenge porn animations or other less explicit videos saying or doing anything that can be thought of, from endorsing someone I don't like to saying something insanely insensitive, such as slurs, classist, racist, or sexist terminologies, and otherwise. If someone can make AI "Art" of anything, they can steal your image of you, real in person you, use an algorithm, and then make you say or do anything they want, from sex, to defamation. It is actively horrible and genuinely has already been used against the president as is.
- 2) I would like to copy write my own original works, and not being able to do so because someone else wants to steal it would be bad. Imagine, you make something new, as a small level artist, and one random person in a corporation sees it. suddenly they can just steal the entire idea and claim it was random when it absolutely was not. AI should be a tool to adjust small errors, not create everything for you. Imagine, if someone wanted to, they could make Mickey Mouse say such vulgarity I can't even write it here.
- 3) The ideas are always so cleaned and sanitized, literally killing creativity so as to prevent people from getting upset, which means you get no conflict at all. These algorithms could be trained on anything, and I mean anything, so they could become heavily racist, sexist, or just outright wrong.
