General Comment

AI, in particular Generative AI and similar forms of machine learning need ADDITIONAL regulations to protect individuals and businesses. Many of the models that exist today are built off of data that is scraped without the knowledge of the parties whom have their data/words/art taken.

The action plan as described will cause great harm to ANYONE that utilizes the Internet in any capacity.

Additionally, this plan will incentivize big-tech to create AI software that is prone to errors and bias. There is also nothing in this plan that would protect children from the dangers of AI in its current form.

The administration needs to take a step back from this plan immediately to protect individuals, businesses, and the free market.
