General Comment

As an individual, I do not support the Development of an Artificial Intelligence (AI) Action Plan. Not only would it infringe on multiple existing laws, including those involving privacy and copyright, it will present major long-term consequences for countless industries. Jobs will be lost, the economy will plummet, and our sense of security will disappear, all while the select few that would benefit from this plan continue to disrespect our country's people in ways that warrant distrust from all sides, inside and out. I refuse to accept a legality that leaves the public vulnerable to mass exploitation and defamation.

With the state it is in now, the AI Action Plan will do more harm than good. Please remember when developing an AI plan that AI should be used to do well what humans do badly, not badly what humans do well.
