General Comment

As an artist, I urgently oppose permitting any AI to be trained freely on content that the owner of the AI does not own. My own work loses monetary value, which is largely based on perceived value due to its uniqueness, from the AI copying of my style and information, and I gain nothing from that loss-- it's only bad for me. If piggybacking off of my human creativity is absolutely necessary to train AI, then my work has value, and simply stealing it runs contrary to the principles of compensation for provided value upon which our capitalist society is based. At best, it's plagiarism. At worst, it's intentional and knowing abuse of power in full understanding of the damage that it does to creators, ignoring our voices of dissent. Therefore, I absolutely do not give permission to use my work to train AI without fair compensation and attribution that I consent to in advance of any AI training; in other words, it is theft to train AI on data that you do not own and is not free for public use. The uncompensated theft of our work by AI actively harms the creators of the original content by diminishing our value, our copyright, and our ability to earn a livelihood as individuals. Ignoring our ownership of our own work in order to use it for your own profit at our expense is illegal, and should remain so for anyone-- no exceptions.
