As of: March 21, 2025
Received: March 15, 2025
Status: [REDACTED]
Tracking No. m8a-vvpp-q75j
Comments Due: March 15, 2025
Submission Type: API

Docket: NSF_FRDOC_0001

Recently Posted NSF Rules and Notices.

Comment On: NSF_FRDOC_0001-3479

Request for Information: Development of an Artificial Intelligence Action Plan

Document: NSF_FRDOC_0001-DRAFT-3694

Comment on FR Doc # 2025-02305

Submitter Information

Name: Noah Urbanovsky

General Comment

Allowing the loosening of AI restrictions is a shortsighted move that will ultimately cause the degradation of commerce in the US. This allows for the livelihood of a massive number of Americans to be tampered with in ways that will cause them to not be able to support themselves or the work that they do, ultimately funneling money to and from a smaller set of people's and degrading life for not just those artists, but for a large number of industries that rely on the arts. (To clarify, this will include traditional image arts, acting of many kinds, animation, music, and more). That's not to speak of the cultural downgrade that will occur in the US, as it begins to be seen as a lifeless country that fails to seek to improve, and only iterate over itself endlessly.

There are no legitimately useful reasons to allow generative AI to have a foothold in any part of our country, as it will simply degrade all facets of life for a quick buck (that will pass, and then leave us worse off than before).
