

PUBLIC SUBMISSION

As of: March 21, 2025
Received: March 15, 2025
Status: [REDACTED]
Tracking No. m8a-vwca-cwjs
Comments Due: March 15, 2025
Submission Type: API

Docket: NSF_FRDOC_0001

Recently Posted NSF Rules and Notices.

Comment On: NSF_FRDOC_0001-3479

Request for Information: Development of an Artificial Intelligence Action Plan

Document: NSF_FRDOC_0001-DRAFT-3698

Comment on FR Doc # 2025-02305

Submitter Information

Name: Jen Dewey

General Comment

I do not believe AI holds a place in the future of the US. Human intelligence is superior, and we do not benefit from trying to create what isn't needed.

AI steals from my livelihood as an American and profits off of theft; anything that has been scraped from the internet has been done so without consent or compensation to the affected parties. AI is overhyped and is fleecing the eyes of the American public; why do we need something that can only "create" (and I use that term loosely) by being prompted by a human anyway? Humans should prompt other humans to do work for them, not use a machine that is based off plagiarism.

It is similar to cryptocurrency and NFTs, both of which make huge promises to investors but don't actually grant any proper returns on investment.

There are also concerns about the safety of our data; we have already seen the private information and photos of individuals being lawlessly scraped and used to train AI servers in horrendous ways.
