General Comment

Hello,

I directly oppose of both OpenAI and Google being allowed to use copyrighted material for generative AI, and I am against them dismantling US copyright law so they have free reign of what they can use for their AI programs without any compensation for the original creators/copyright holders. Dismantling copyright laws strictly for the purpose of large tech corporations being able to steal from copyrighted works should not be something that can be allowed to happen. Not having our current copyright laws in place will affect every business in this country, both big and small. Enacting this would also affect millions of Americans who create art of every kind that exists, both independent and even ones who work for large media companies like Disney. Please do not let OpenAI and Google control our existing laws on copyrighted material. We have these laws in place for a very good reason.

Thank you.
