General Comment

AI cannot generate any content without scrapping existing content. It cannot process falsehoods from truths. The proliferation of the use of AI will only serve to hurt the average American citizen as the select few who already have more money than sense, regurgitate the stolen efforts of those they deemed unworthy of protection, back and forth between themselves forever. Each wave of which will further distort Truth into nonsense. Further erode the artistic endeavors of humankind into unrecognizable slop of pixels of no value.

All at the significant cost of precious resources we need to live as a species. Stop boiling our water, stop burning the plants we need to breath, just away to power a pathetic tangle of code someone has convinced you is all powerful. This "AI" as it is presented to us is a mockery, a sham, for those with all the power in the world to further force the gap between themselves and the common man.

Do not support the expansion of AI, if anything support the expansion of detecting the use of AI, it's falsehoods, and the protection of American citizens.
