

PUBLIC SUBMISSION

As of: March 21, 2025
Received: March 15, 2025
Status: [REDACTED]
Tracking No. m8a-vzfa-l5oa
Comments Due: March 15, 2025
Submission Type: API

Docket: NSF_FRDOC_0001
Recently Posted NSF Rules and Notices.

Comment On: NSF_FRDOC_0001-3479
Request for Information: Development of an Artificial Intelligence Action Plan

Document: NSF_FRDOC_0001-DRAFT-3730
Comment on FR Doc # 2025-02305

Submitter Information

Name: Joardy Looney

[REDACTED]

General Comment

While I can see artificial intelligence's (AI) value in the advancement of modern medicine, I believe the generative AI - - the kind that takes from any and all copyrighted material in order to regenerate low quality images and passes it off as its own work or the work of someone else. It's stealing plain and simple. Stealing from talented individuals who work tirelessly in this country to delight and entertain a growing audience. Artist are being muscled out of the industry that was made for them by a tool that was made to work against them. This isn't automation at its finest, but rather a thinly veiled scam from tech companies that refuse to hire those with the talent to create, or refuse to learn themselves.

If generative AI cannot exist without stealing from others, then it doesn't have a place in this country of workers, doers, and creators. The demand for this technology is overinflated by those looking to siphon from this countries two resources; Our wallets, and our artist.

One of the biggest exports in the US comes from our entertainment industry. Artist who have worked on stages, backgrounds, art, and animation. All of these things have entertained a worldwide audience and was crafted by talented individuals living here in this country. If Generative AI is allowed to train on copyrighted material, then there will be nothing stopping that industry from falling apart. These generative AI tricks are a flash in the pan, and when it's left to make something on the scale of a blockbuster movie, people will look elsewhere for entertainment. To give AI full rein over something warm blooded Americans have created themselves, would be giving our entertainment industry a shovel to dig its own grave.
