General Comment

I strongly oppose this measure. AI steals original content for corporate gain. They want access to our hard work for free so that they can profit on our livelihoods. AI companies literally illegally steal our work and attempt to sell it back. AI is an overhyped trend that the American people are tired of and is only pushed by corporate interests because of monied investments. Sorry you made the wrong investment, but we don't want this.

AI does not have a future in America- it steals American jobs, steals American's livelihoods, steals original creative materials, and consumes vast unnecessary amounts of energy. It's a bad investment and a bad way forward for America.
