Docket: NSF_FRDOC_0001

Recently Posted NSF Rules and Notices.

Comment On: NSF_FRDOC_0001-3479

Request for Information: Development of an Artificial Intelligence Action Plan

Document: NSF_FRDOC_0001-DRAFT-3752

Comment on FR Doc # 2025-02305

Submitter Information

Name: Drew Rose

General Comment

I do not believe Generative AI has a future in the United States of America. If anything we should be combating its continued and lax use since it has incredible potential to mislead and confuse the public as to what is true.

Voices, images and written words may be forged by those with nefarious intent to undermine professionals and elected officials by forces both foreign and domestic if this tool continues to be utilized.

While it serves us well in sifting through mountains of data, sealing holes in digital security and increasing the accuracy of medical diagnostics, it should be relegated to those specific fields and even then, heavily scrutinized by human experts as all things should be. It has no other place in this country and anyone who vouches for such dubious uses in the name of "national security" should be suspect.
