General Comment

I am a small business operator and artist based in the US. Generative AI already causes massive headaches in every part of my industry. From dropshipped products featuring generated artwork flooding Etsy and making it unusable for small handmade item owners, to AI chat bot scams infiltrating sales channels with fake example/proof images, it's already a huge issue. I deal with clients thru Facebook Marketplace, Craigslist, and Etsy weekly who have lost faith in artists and craftspeople because they are unsure if the things they are seeing are real, or created by AI to take their money without delivering properly.

Whether or not it's created with the intent to scam, generative AI content scraped from the creative work of Americans is being used to displace jobs/gigs and swindle money from hard-working residents of this country.

The unauthorized use of creative work to feed AI tools is unethical and we must have legal options to pursue damages. Fight back against OpenAI protections.
