General Comment

This is nothing less than legalized theft in order to funnel money into the pockets of Sam Altman, a con artist who has yet to demonstrate a single actual use case for his product. If you choose to overlook any and all issues pertaining to art itself, this will do nothing but enrich a thief and help to impoverish American artists, weakening a sector of our own economy and giving no public good in return. Plus it establishes a slippery slope when it comes to creative rights, encouraging book publishers and movie studios to leave the USA and go to other countries where their rights will be protected.

Generative AI is a grift akin to NFTs, a solution in search of a problem. This will only weaken our nation and make us MORE vulnerable, not less.
