Docket: NSF_FRDOC_0001

Recently Posted NSF Rules and Notices.

Comment On: NSF_FRDOC_0001-3479

Request for Information: Development of an Artificial Intelligence Action Plan

Document: NSF_FRDOC_0001-DRAFT-3778

Comment on FR Doc # 2025-02305

Submitter Information

Name: Mary Mullett

[REDACTED]

General Comment

I see that this request for information seeks to eliminate "unnecessarily burdensome requirements" from private sector AI innovation. I find this perfectly ridiculous.

Do NOT allow AI to use copyrighted works without levying the appropriate fees. Even libraries, with all the leniencies given to them in the name of free use, cannot remix and distribute copyrighted works without significant limitations and costs. Why should generative AI slop machines be allowed to materially benefit off of work it does not own, just because it uses a volume of copyrighted works beyond the realm of human imagination? Frankly that makes it worse.

AI and its private owners are bound to the law the same as anyone else. Copyright infringement is copyright infringement-- particularly when used for commercial ends. Don't let the AI bubble industry break the law just to make a quick buck.
