General Comment

OpenAI and all constituents similar to OpenAI should operate WITHIN THE CONFINES OF THE LAW and should not be given complete and open access to do whatever it wants. Under no circumstances should OpenAI and all other relevant corporations be allowed to operate outside of the laws of copyright or any other laws, rules, regulations, or policies surrounding the protection of art and any other material that can be given to an AI database. OpenAI and other corporations operating, utilizing, or experimenting with AI databases should ALWAYS be under the scrutiny of the law, whether those laws are state or federal laws.

This comment is vehemently against giving OpenAI, and all other parties that utilize AI databases, free reign over pillaging and scraping information from the Internet to feed their database models. This comment demands that OpenAI, and all other parties that utilize AI databases, operate under the RULE OF LAW, and if that causes these corporations to fail, then these corporations should have not been given operational stability in the first place.
