General Comment

AI should have to face the same scrutiny regarding use of copyrighted materials that individuals and other corporations do. The fact that generative AI is only feasible to produce if they are allowed to rob the public with 0 compensation means that it contributes nothing valuable to society that we are not already doing. If AI companies want enough media to train their models they should have to pay for access to copyrighted material or produce the media themselves at their own cost. Do not let them take money and work from talented hardworking citizens to funnel money to uncreative, talentless hacks to flood the world with slop.
