General Comment

I have no interest in supporting the ability for private AI companies to have any right to train their programs with copyrighted material. If they wish to train their programs so badly, they can do it legally and with explicit permission granted by those whose resources they're after. Generative AI as is relevant to the scope of this action plan has no place in the future of the United States, and will only serve to replace the valuable jobs and labor of competent citizens with content of subpar quality.
