General Comment

AI in its current form has no place in the world to function as a helpful product. It is a money-sucking hole of a business model that requires illegal theft of copyrighted material to train itself.

Unlike photography, which is considered a transformative, and self-expressive art form, AI requires insignificant to no input on the "artist"'s side. This means it is not a tool for artistry, but a tool against it.

If AI is given the ability to create material that is no longer effectly under open source, then millions lose their jobs. Music, painting, sculpting, designing, and more will all lose any form of human touch. This is a horrific scenario to every artist with a shred of common sense.

Do not let this pass.
