General Comment

We should not allow AI to scrap/steal anyone's data! Period! All it does it regurgitate information and jumble things up, leaving it unreliable and create disinformation. Not to mention that more often than not, they steal from other people's work that they did not consent to. This is both dangerous and unnecessary. AI can be useful of given time, but we need sustainable power and regulations. Pushing a new tech that has proven time and time again to be unreliable will not solve anything.
