General Comment

The use of AI is disastrous in most fields. In art and creative works, it steals from established artists and musicians to create. In academia, it has no capacity to fact-check and fabricates claims and ideas. On top of all of that, the technology required to run these systems does immense economic harm and draws from electrical grids that are already suffering from overuse due to crypto technologies.

Neither the inputs nor the results suggest that AI is a useful technology. Much like NFTs, this is a fad technology that will be abandoned soon. The US should NOT seek to invest in it.
