## General Comment

AI should not be able to use copyrighted material without paying for it.

AI is a misnomer - there is nothing "intelligent" about it - it is just a fancy autocomplete function. "National dominance" thru LLMs is a joke - using LLMs to write essays or code erodes the skills of our people, and those are the skills we need to build national dominance. Who cares if the commodified LLM that people use is Chinese, we want the \*people\* to be the best they can, and that can't be accomplished with LLM AI.

AI has made the Internet unusable - search results are nothing but AI slop now and it's terrible.

AI energy use needs to be curtailed - it is a hazard to the communities the data centers are located in, and by extension to the country at large as we use dirty energy to fuel this plagiarism machine.
