General Comment

I'm asking you to not let big corporations and organizations freely use copyrighted material to train their AI, As it will be used to steal livelihood and work from American and other countries people. The current excitement for Generative-AI is over-hyped and is fleecing people and corporations of their money and time, and i believe that it doesn't hold any place into peoples future due to it many flaws that the corporations won't talk about.

Please don't let corporations or organizations be able to train their AI on everything, as it goes against the Berne Convention for the Protection of Literary and Artistic Work. As it WILL destroy the job market.
