## General Comment

As an artist, creator, computer technician, and person who has experimented with existing AI models, i have rather specific insight on AI and how it impacts both small and big artists. AI is little more than a plagiarism blender. AI can and will harm all art and entertainment industries, small and large alike, if it is allowed to continue on its current path. AI should never be immune to copyright issues, as the only way an AI can understand a copyrighted entity, is if it was initially fed into its training model.
