Docket: NSF_FRDOC_0001

Recently Posted NSF Rules and Notices.

Comment On: NSF_FRDOC_0001-3479

Request for Information: Development of an Artificial Intelligence Action Plan

Document: NSF_FRDOC_0001-DRAFT-3892

Comment on FR Doc # 2025-02305

Submitter Information

Name: Hanina Cassel

[REDACTED]

General Comment

It is ludicrous to consider that this use of stealing works for large training data sets by corporations who intend to make money off of it is somehow a fair use given the history of fair use in the United States. Simply farcical. It goes against all established copyright law.

Also: I do not believe AI holds a place in the future of the US. AI steals from my livelihood as an American and profits off of theft. It discourages the creation of new work and turns art into an ouroboros defecating out AI art and then eating it own feces, over and over again until art deteriorates into nothing but feces. It is already destroying references in search online.

Also, AI is overhyped and is fleecing the eyes of the American public. Nobody wants this except short-sighted executives who do not understand this work is not only ultimately unprofitable in the long run (they do not understand the long term, only the next quarter, as shown by their idiotic actions) but also destructive to art and human knowledge as a whole.
