General Comment

I do not believe AI holds any future in the US. Not only is public opinion of AI cratering every day, as someone in an artistic field AI directly stands to steal from my livelihood and profits off of theft. The fact that AI companies are adamant that their industry would not be able to function without this unprecedented level of copyright violations and theft of intellectual property should be a hint. AI is also a speculative market similar to cryptocurrency and NFTs, with false promises to fool the public and huge legal problems by enabling them. It's massively overhyped and is fleecing the American public at large.
