General Comment

First and foremost:

AI does not have a place in the future of the United States.

AI steals directly from MY livelihood and the livelihoods of my many fellow Americans.

AI hype is a great bubble looking to pop any time and has been grifting from the American people.

The training of AI through copyrighted data which those that train the AI have never had rights to should be admonished to the extreme. It is theft and should be held as such. If it cannot be, then copy protection policies as a whole serve no purpose and it serves to show that we shouldn't have them. It's simply black and white: taking the data of the people without rights to do so to train AI is thievery.
