

PUBLIC SUBMISSION

As of: March 21, 2025
Received: March 15, 2025
Status: [REDACTED]
Tracking No. m8a-wjbj-ilsv
Comments Due: March 15, 2025
Submission Type: API

Docket: NSF_FRDOC_0001

Recently Posted NSF Rules and Notices.

Comment On: NSF_FRDOC_0001-3479

Request for Information: Development of an Artificial Intelligence Action Plan

Document: NSF_FRDOC_0001-DRAFT-3925

Comment on FR Doc # 2025-02305

Submitter Information

Name: William Segard

General Comment

AI CANNOT BE HELD ACCOUNTABLE

THEREFORE, AI CAN NEVER BE ALLOWED TO MAKE MANAGEMENT DECISIONS

These large language models are not nearly as capable as people would have you believe, and are unlikely to be ever capable of much of what people are trying to sell you on. I am not exaggerating when I say you can easily convince a large language model that two plus two equals five with only mild suggestion, and they can potentially get even basic multiplication tables wrong all by themselves; they spent all that money on making a COMPUTER forget how to do BASIC MATH, and they think it can do literally *anything* of value? If your computer program is beaten by a dollar store calculator, I would fire you and try to get you blacklisted from the industry.

There is simply no way literally anything good comes of scraping the entire internet to feed it into The Machine That Lies To You Because It Genuinely Doesn't Understand How The English Language Works. Because it doesn't understand how the English language works! It just decides what's statistically the most likely letter sequence to follow after the letter sequence it has currently, and then repeats that until it comes up with "statistically, there would be a period here". That's all it is. That is the foundation of the technology, and that is all it is capable of doing.

Please, rip up this executive order, and tell President Trump to tell Elon to keep his hands to himself and stop trying to drag the highest government office in the land around on a leash.
