Docket: NSF_FRDOC_0001

Recently Posted NSF Rules and Notices.

Comment On: NSF_FRDOC_0001-3479

Request for Information: Development of an Artificial Intelligence Action Plan

Document: NSF_FRDOC_0001-DRAFT-3949

Comment on FR Doc # 2025-02305

Submitter Information

Name: Shane Glander

General Comment

The United States of America has an rich, extensive history and legacy that was built upon from our ancestors. How was their history passed on through? Art. Writing. Creative process of the human mind, dictated through artistry. We can understand word spoken to us, but visuals help fill in those gaps, give us something to help us become more immersed in that visual. Written language has the capability to make a story feel like an adventure. Artists are responsible for many things taken for granted. The American flag, the fine business suit you are wearing, the Rolex on your wrist, the iPhone you use for communication, those were engineered to work yes, but the artists made it look good. Artists make our pathway forward colorful, elegant and beautiful. However, artists are also human. Humans need housing, shelter, food and water. They need to be able to work and create, what this bill proposes is going to jeopardize all of that. Generative AI is inherently theft, thievery of those who made our country beautiful, exciting and full of color and joy. Generative AI has proven it has a great creative power, but it is stolen power, taken off the backs of generations, and by enacting this bill, you are effectively taking away every creative person's ability to be able to create and survive.

This bill cannot pass if you truly care about the American people and their capacity to create a better Future.
