General Comment

Generative AI steals jobs and harms our society. The companies developing it do not care about citizens or even the well-being of this country, only filling their own pockets. AI is used for misinformation & lies as well, many slanderous things are made about politicians, celebrities & regular people. AI is largely used for evil sexual harassment acts, including towards children. AI is often used for scamming people as well, especially elderly that cannot tell the difference. One can go on any social media and see the absolute mountain of garbage and scams it has. Do not fund AI, it is used as a tool of propaganda, theft and misinformation. The only thing we should be using it for is how to destroy other countries looking to flood us with it. We shouldn't be trying to beat China in the race towards better AI, we should be trying to poison the pool and make it so other countries don't want to use it.
