General Comment

AI is an environment destroying machine built on theft and plagiarism that does not deserve the government's attention or money. There are far more important things to be focused on than seeing if these useless, resource draining data centers can produce even a modicum of useful information. Search results are often incorrect or based on lies. So called "art" is ugly, incoherent, and eye-rollingly bad. The text it produces is inhuman and only fit for the driest of emails to other bots that will summarize them into garbage. Drop this ridiculous chain of thought and fund things that are actually important, like libraries, museums, and other forms of art that humans create. This is a waste of time.
