General Comment

Don't let AI developers train on copyrighted work without restraint and/or consequence. Generative AI is not the silver bullet to every problem like AI companies want everyone to believe. AI is amazing for solving specific problems, as demonstrated by AlphaFold. This is a great use of the technology. People don't want AI that plagiarizes all manner of art, written and visual, to answer questions incorrectly and steal livelihoods. Please stop this monster from growing bigger and redirect these efforts to problems that actually need solving the way AlphaFold has done. Thank you.
