## General Comment

Generative Ai is some of the most useless capitalist &^% that is putting SO MANY americans out of jobs and creative fields. It's spewing out some of the worst content imaginable while taking food off tables during an already hard time just so companies dont have to hire real people.

Art is human right to make, not generated by a program that steals from others.

AI should be used for medical advancements, not stealing passion or using it to fire government workers who don't abide by a South African man who illegally appointed himself in charge. Not to tear families from their homes because they speak up about a genocide in other countries and happen to not be from here originally.

Generative AI is just the start, it's stolen spewed drivel. It's ruining careers of so many artists.

Socks the Macro WolfDad

What should I say?

Technically anything, but these will be powerful:

- \* I do not believe AI holds a place in the future of the US
- \* AI steals from my livelihood as an American and profits off of theft
- \* AI is overhyped and is fleecing the eyes of the American public.
