

PUBLIC SUBMISSION

As of: March 21, 2025
Received: March 15, 2025
Status: [REDACTED]
Tracking No. m8a-wqyh-6uml
Comments Due: March 15, 2025
Submission Type: Web

Docket: NSF_FRDOC_0001
Recently Posted NSF Rules and Notices.

Comment On: NSF_FRDOC_0001-3479
Request for Information: Development of an Artificial Intelligence Action Plan

Document: NSF_FRDOC_0001-DRAFT-4016
Comment on FR Doc # 2025-02305

Submitter Information

Name: Anon Ymous
Address: United States,

General Comment

Generative AI does not have a future in the markets and industries that Silicon Valley is heavily pushing to adopt this technology. It openly steals copyrighted materials wholesale, mostly without consent or knowledge from the people being stolen from, the gen. AI companies have stated that they need to keep stealing tons of data and media in order to make profit — which is unrealistic and unsustainable — and some corporations like Microsoft have begun backpedaling some gen. AI projects as they are starting to realize the market they were hoping to have for these products isn't there. Gen AI is deeply unpopular with the public as the results provide incorrect data, at times fatal to people's health, media created with gen AI looks and reads terrible, and using it only creates further strain on power grids and data centers when we should be pursuing ways to back off data center reliance and power usage in order to curb global warming and make our future somewhat less bleak than it's already looking to be. Last but not least, gen AI has ruined jobs in creative industries as executives are all too eager to try and replace creative employees, or have those employees "edit" gen AI output, which is known to create more unproductive work than it saves. All these executives aren't pushing for gen AI — or bitcoin or NFTs before it — because they think it's the future, they're pushing for these ponzi scheme technologies because they invested too much money in them and don't want to see their foolish squanderings — I mean investments — go down the drain that it will inevitably fall into. To them I say "tough s&^%", you probably have more than enough money anyway, why don't you put it towards public programs that will actually better society instead, like affordable housing or something.
