

PUBLIC SUBMISSION

As of: March 21, 2025
Received: March 15, 2025
Status: [REDACTED]
Tracking No. m8a-wt66-k9qg
Comments Due: March 15, 2025
Submission Type: Web

Docket: NSF_FRDOC_0001

Recently Posted NSF Rules and Notices.

Comment On: NSF_FRDOC_0001-3479

Request for Information: Development of an Artificial Intelligence Action Plan

Document: NSF_FRDOC_0001-DRAFT-4043

Comment on FR Doc # 2025-02305

Submitter Information

Name: Raven Darkholme

Address: United States,

General Comment

As an artist and writer, if a human person were to copy my work directly and claim credit for it then I could defend my work against that. I own my ideas and I own my work. I do not understand why it should be permissible for a human person to copy my hard work and claim credit for it when they use a computer program as the tool instead of doing it directly themselves. This will be catastrophic for writers and artists in all fields, from fiction to journalistic to scholastic... it's all going to be scraped and turned into a hallucinogenic slurry. It's dreadful. It goes against what it means to be human, to create, to strive, to look at the work of others and to build on it as opposed to taking the work of others and grinding it into a bland paste. It's theft, thievery that will be injected back into society as an intellectual and artistic poison.
