General Comment

On absolutely all levels, this should not be passed. While there is a future in which AI can help humans flourish, right now AI is being used to find ways to drive humans out of jobs for the sake of efficiency. We **need** restrictions in order to develop better AI-related algorithms and programs in a way that strictly benefits humans--not in one that freely profits from our creations, not in an attempt to replace human jobs for profit-minded reasons. Please do not consider this plan whatsoever.
