General Comment

I am an artist and someone in the tech field. I am familiar with how "AI" works, and all it does is take the data given to it, jumble it up a bit, then spit out whatever is requested of it. It cannot think, nor is generative AI intended to. It's just intended to be a cash grab. And I refuse to allow my artworks to be part of this cash grab. It voids copyright, and it voids our rights to our own data. These AI don't just crawl art sites, they crawl everywhere. They steal data from everywhere that isn't secure enough. It's not just art. It's pictures, posts, writings. It's things most people never expected they had to worry about. So do not allow generative AI companies to keep stealing from people. Protect our data.
