Recently Posted NSF Rules and Notices.

Comment On: NSF_FRDOC_0001-3479

Request for Information: Development of an Artificial Intelligence Action Plan

Document: NSF_FRDOC_0001-DRAFT-4057

Comment on FR Doc # 2025-02305

Submitter Information

Name: S E

General Comment

Generative AI takes away the livelihood of myself and many of my fellow Americans.

Most importantly, and this is for every sector - not just creative: AI HAS NO REASON TO IMPROVE ITSELF, BE ACCURATE, OR CAN BE HELD ACCOUNTABLE. I cannot stress this enough. It is a parrot that seeks to fill in what it has been told are logical blanks, not search for inaccuracies or be responsible for quality. A HUMAN worker has MOTIVATION to do well, be correct, and can be held accountable when things go belly up.

I make a living providing audio design and voice work for many brands, giving their presence human empathy when people sit through ads or have a phone service guiding them as they have to navigate difficult life events. Generative AI cannot and will never be able to do this. I also have a REASON to do well at my job: I have pride for my craft and reputation, yes, but incidentally also need to eat and pay rent. I can also be held accountable when my work is incorrect or sloppy. You cannot sue or point fingers at ChatGPT's AI as its creators throw up your hands in befuddlement when someone's child commits suicide over its responses. This is the future you're permitting if you don't work on a just and firm action plan where AI is not allowed as such an unregulated tool - ESPECIALLY in the most vulnerable sectors of our lives like the creation of specifically human experiences and ideas.
