General Comment

AI training has been completely unscrupulous and harmful since day one. Never has any technology gobbled up data on such a wide and public scale. Without a way to opt out of this, it has become a means to undercut hardworking freelancers, robbing them of livelihoods. Money remains in the hands of large corporations without any way to even credit the sources for exposure, an already lowly move. This isn't even to mention the legal can of worms that can lead to the explosion of revenge porn, or any generations that use someone's likeness without their consent. Silicon Valley's motto of move fast and break things should be reined in when it comes to the privacy and work of hundreds of millions of people. Make data training opt in, or make the product free and stop profiting from blatant theft.
