Re: National Science Foundation's Request for Information on the Development of an Artificial Intelligence (AI) Action Plan

When I turn 18 in a couple months, i want to become a Comic Book Illustrator, Like Frank Miller and Erik Larsen. If this new bill allows for AI companies to use any material to train them, i will never get that chance.

People who make comics have it hard enough without their jobs being on the chopping board for Artificial Intelligence. Being one of the least respected professions in the world, we do not have a union and are subject to freelance work. if this new bill is to pass, our careers are over, as the corporate suits will love cutting corners and replacing us with cold unfeeling robots. Comics were once a tool to express ourselves with, and this is a medium that is very near and dear to my heart. so i will not let it be taken over by robots who cant even use a pencil. I do not support artificial intelligence being used creatively in any fashion whatsoever. please do not vote yes on this bill.
