General Comment

Greetings. I would like to leave a comment about the dangers of removing copyright protection from copyrighted works to train AI as there will be disadvantages posed for everyone including OpenAI if this passes. Given the intention to cut copyright laws this gives other individuals the opportunity to also train their own AI on your works without pay or credit since you will also be vulnerable to same law and since AI isn't copyright-able, you cannot do anything someone decides to. So it would be in your best interest to refrain from allowing OpenAI to freely use copyrighted works in their training.
