Comment On: NSF_FRDOC_0001-3479
Request for Information: Development of an Artificial Intelligence Action Plan

Document: NSF_FRDOC_0001-DRAFT-4092
Comment on FR Doc # 2025-02305

Submitter Information

Name: Daniel Byrnes

[REDACTED]

General Comment

The development of artificial intelligence in its current incarnation (large language models) is both untenable and immoral. To continue to allow massive for profit corporations to steal the work of others to generate profit for themselves at the expense of every citizen just because they use the infrastructure created in part by their tax dollars is horrifying.

This will not even spur innovation, as has been seen with Chinese companies able to produce comparable models with less effective hardware and less access to such works. Allowing this practice to continue will only cement the idea that AI companies do not need to innovate in order to succeed. Instead it will show them that they can simply rely on the work of others to make them appear profitable to their investors, while other countries surpass us.
