General Comment

Any generative AI that requires training on uncompensated copyrighted works, without the permission or cooperation of the original artists and creators, is a disgusting and offensive proposition, and does not deserve consideration by any decent person. Rushing headlong into an unproven technology that has never lived up to a single promised advantage, all while insisting that it requires breaking the law and harming actual human beings, is deeply foolish and a waste of time and money. I will never support such lawless and wasteful technology.
